

# RECYCLING COLORS

## WHAT ARE WE GOING TO DO?

We are going to learn how to recycle properly, without harming the planet. Recycling is of great importance, but you must be accompanied by two other friends, Reuse and Reduce. So we will also know the Three Rs Rule: Reduce, Reuse and Recycle. They are like the Three Kings, they always have to go together.

## WHAT MATERIAL ARE WE GOING TO NEED?

- 4 cardboard boxes (remember if it is recycled, the better!)
- Colored sheets (you can also use colored cardstock or blank sheets and color the different parts with crayons, pencils or colored markers)
- A scissor
- Adhesive tape
- A pencil
- A black marker

## STEPS TO FOLLOW:

1. We will design the four main characters in recycling: Papelín (blue container), Plasticote (yellow container), Organiclón (orange container) and Vidrie (green container).
2. Punch a hole in the center of each of the boxes.
3. Use the adhesive tape to close the bases of the boxes.
4. Cut out each of the characters and glue them to the boxes.
